

Turtle Tots

3 year olds-Kindergarten

June 29 – July 3: Week 1

The World Beneath Our Feet

There's a treasure trove of things to discover in the world beneath our feet. Together we will investigate the amazing animals with underground adaptations.

July 6 – July 10: Week 2

Powerful Plants

Why are leaves green? How do trees grow so tall? Spend the week answering these questions and more as we investigate the superpowers of the plant world.

July 13 – July 17: Week 3

Brilliant Birds

These fine feathered friends are all around us and have very important jobs. We'll spend this week investigating where birds live, how they find food, build nests, and more.

July 20– July 24: Week 4

Wonderful World of Weather

From snowstorms to rainbows, different weather events are happening all over the world. Get ready for games and experiments to understand how different weather events occur and how they affect nature.

July 27 – July 31: Week 5

Little Critters

Get up close and personal with the tiny creatures that call our backyard their home. Become a "micro-scientist" as you learn to appreciate the little things in life.

August 3 – August 7: Week 6

The Skin You Are In

Feathers, fur, scales, and slimy skin all animals have different types of coverings. Learn if turtles can really come out of their shells, what the difference is between a salamander and an alligator and more.

August 10 – August 14: Week 7

Where the Wild Things Are

All around us, there are hidden homes! We will spend this week exploring various environments and discuss helpful hints for a healthy habitat.

August 17 – August 21: Week 8

Art in Nature

Explore concepts of art such as color, texture, line, and shape. We will create sculptures, mosaics, and mandalas inside and out. Learn about the beauty of the natural world.

Explorers

Rising 1st & 2nd Graders

June 29 – July 3: Week 1

Incredible Invertebrates

Did you know that invertebrates are an important part of our ecosystem? They can be found all over the world and sometimes in extreme environments.

July 6 – July 10: Week 2

Dig Into Dirt

There's a treasure trove of life buried beneath our feet. Together, we will investigate the secret life of soil, discover delightful decomposers, and even conduct some soil experiments. Let's find out why a little bit of dirt doesn't hurt.

July 13 – July 17: Week 3

Wonderful World of Water

From snowflakes to your water bottle, water is everywhere. Get ready for a week of water games, studies, and experiments to understand why water is so important to all living things.

July 20– July 24: Week 4

Powerful Plants

Why are leaves green? How do trees grow so tall? Spend the week answering these questions and more as we investigate the superpowers of the plant world.

July 27 – July 31: Week 5

Fantastic Fossils

Did you know New Jersey was once home to dinosaurs? Your child will see the world through a paleontologist's eyes as we dig into the mysterious lives of these ancient reptiles.

August 3 – August 7: Week 6

The Skin You Are In

What is the difference between a frog and a toad or the scales on a turtle vs a snake? Learn the answers to these questions and more as we spend our days discovering all the different types of coverings animals have.

August 10 – August 14: Week 7

Animal Superpowers

Many animals have unique 'superpowers' to help them survive their habitat. Throughout the week we will learn about some of these cool adaptations .

August 17 – August 21: Week 8

Survival Games

If you were lost in the woods, how would you survive? Along with a naturalist-educator, campers will learn basic skills such as orienteering and shelter building. They'll have a blast putting their new skills to test in our woodlands.
